Aston Martin DB2 Convertible

1951

Gallery

"3-piece grille" Chassis : LML 50/48 Engine : LB6B 50/337 - Vantage I am proud to be able to represent this stylish and rare Aston Martin DB2 Convertible again. Attentive customers will remember, this DB2 Convertible was previously part of my classic car stable. The cars' life started initially down under in Australia but came back approx. 5 years ago to the old continent by which time the DB2 had been meticulously totally restored. A Swiss Aston Martin specialist and a well known colleague classic car dealer, took well care of this beauty. This rare early 3-piece grille DB2 (only 50 were made with this particular bonnet) looks absolutely stunning in her light green metallic paint finish and gorgeous beige leather interior. Hood and tonneau cover in double duck mohair canvas complement these colour combinations very attractively. The chassis and under bonnet area can be described as being in a sparkling concours condition. A set of beautiful expensive Borrani wheels underline the top class no expenses spared reconditioning effort of this sports car. As could be expected, this exclusive Aston Martin is a real joy to drive on the road. Very homogeneous feeling (no rattles whatsoever) and a lot of punch ! This rare, very early DB2 Convertible will no doubt be very soon someones pride and joy. Could this be you ?

Brand	Aston Martin
Model	DB2 Convertible
Year	1951
Steering	Right (RHD)
