Aston Martin DB4 SII

1961

Gallery

This stylish Touring-designed Coupé, is in my opinion the British sports car which offers the best combination of style, advanced technology, comfort and strong sensations. As you can see from the photographs, this SII DB4 is in excellent cosmetic condition. The colour combination of Dubonnet Red with black leather suits this Aston Martin very well. Clever mechanical upgrades illustrate that the previous owner was a discerning connoisseur of the Aston Martin make and DB4 model. Now fitted with 3 SU carburetors giving the 3.7 liter engine more edge. Installation of the biggest 21 pints sump, guarantees perfect oil cooling. An upgraded rear axle with telescopic rear shock absorbers gives the car better road behaviour. When I test-drove this DB4 for the first time, I was immensely impressed by the faultless civilised manners of this stylish sports Coupé. What a pleasure being at the wheel !

Brand	Aston Martin
Model	DB4 SII
Year	1961
