Austin Healey 100/4 Le Mans - M Spec.

1956

Gallery

You are looking for a nice Healey ? Well you just found one! This Healey 100/4 M "Le Mans" is in super condition. Completely restored from the bare chassis onward just a couple of years ago and finished with an impressive attention to detail. Just run in now, and properly sorted. Immaculate chassis and body with excellent doors, bonnet and bootlid gaps, smashing appearance in nicely painted "Ice Blue" which suits this car so well. Sparkling engine compartment and terribly attractive cockpit trimmed in dark blue leather with white piping. Perfect blue hood, tonneau cover and side screens. Itelligently uprated to correct "M-specification" not only by fitting a louvered bonnet and a sexy leather strap, but also by fitting the typical cold air box on the bigger SU carbs and special inlet manifold. The hart of the engine received a balanced cranck and flywheel, 100M pistons, a sharper M camshaft and competition camfollowers, uprated oil pump, a "modern" oil seal at the back of the cranckshaft, airflowed cylinderhead ports, lead-free fuel adaptation, uprated rockerarms, competition valves,stronger valve springs, etc...etc... The typical glorious sound of this 4 cylinder Healey is even more accentuated by the tubular exhaust manifold and big bore exhaust system. You have noticed it : this Healey 100/4 is something special, no, she is fantastic ! Just come and have a look at her, dare drive her, and I assure you there is no way back. You will want her... Healey heaven on earth !

Brand	Austin Healey
