Jaguar SS100 2.5 L

1936

Gallery

What a pleasure to be able to unearth this genuine Jaguar SS100 (chassis 18014) sleeping for many years quietly in the Brussels garage of the long term (48 years!) last owner ! The rather muscular and 'no frills' appearance shows clearly that this SS100 was/is a real "drivers' car". Upgraded with a 3,5 liter engine, fitted with a more precise XK120 steering box and lightened with sporty cycle wings and stripped from her unnecessary coachwork, this SS100 demonstrates convincingly her brutal, animal power. One of my since many years loyal French customers seized the opportunity of availability of this iconic SS100 immediately and asked us to sort-out this sports car for him so that this important prewar Jaguar could complete his beautiful Jaguar collection.

Brand	Jaguar
Model	SS100 2.5 L
Year	1936
Steering	Right (RHD)
