Maserati 3500 GT

1962

Gallery

This Touring-bodied Maserati 3500 GT Coupé is one of my favourite Italian sportscars. In the past, I have often been tempted when finding one or another for sale, but I was always put off by the usually average condition of them. This SII however is in top condition being restored by a Dutch specialist for himself over a period of ...28 years ! Inspecting this 3500 GT, it is obvious that this restoration was very expensive and that my selling price does not cover the expenses made ! The huge advantage of the SII models is that they benefit from the superb 5-speed ZF box, disc brakes all around but still are fed by the reliable triple twin Weber carburettors instead of the capricious Lucas fuel injection of the later models. Admire with me : -the sleek Touring designed state of the art Superleggera aluminium body finished in metallic grigio. -the attractively designed, fully retrimmed red leather interior. -the stylish dashboard layout with all original instruments. -the sparkling Borrani wheels with new Pirelli cinturato tyres. -the twin spark 6 cylinder full aluminium engine straight from the race track. -the super clean engine bay. -the still in original material trimmed boot compartment. -the nicely detailed underneath appearance with SS exhaust. You did understand well by now : a beauty !

Brand	Maserati
Model	3500 GT
Year	1962
