Triumph TR6

1971

Gallery

Triumph TR6 LHD - 1971 This is an original Belgian (so from new Fuel Injected) Triumph TR6, which we completely restored for our Belgian customer approx. 20 years ago. This previous Belgian owner had the car as a university student and kept the sportscar all over his career. Now he recently retired and bought a more comfortable open sportscar from us. When we undertook the complete restoration of this TR6, we were in those days a little bit surprised that our customer wanted to invest such an amount of energy (which translated in a, for us, silly amount of money), but over the years we understood that in fact, emotional value has no price... Still in perfect condition inside-out (this Triumph TR6 was not driven a lot), this TR6 represents a fantastic opportunity for someone who wants a super-quality TR6 without having to pay for a full restoration. Finished in her original color of dark blue with black (leather) interior and perfect black vinyl hood, the global presentation of this TR6 is very attractive. The very smooth and powerful (150 BHP) 2.500 cc fuel injected 6 cylinder engine guarantees strong sensations while producing (through a full stainless steel exhaust) a glorious sound. We presented this Triumph TR6 every year here in Belgium to the Controle Technique test as a normal car (not as an oldtimer), so that the owner could be sure his sportscar was all the time in tip-top condition.

Brand	Triumph
Model	TR6
Year	1971
