Jaguar MKII 3,4 L

1964

Galerie

Here is a rare opportunity to acquire a top quality Jaguar for everyday use. Before recently undergoing a full body restoration and repaint in our workshops, this car was wisely upgraded by its fastidious owner so as to enable him to tackle modern-day traffic conditions on an every day basis. A Kenlowe fan, electronic ignition and fuel pump, seat-belts fore and aft, rack-and-pinion steering, halogen light bulbs, fog lamp, headrests to front seats and working period radio -all added in a way that does not alter the period feel and looks of the car- contribute sensibly to relaxed long-distance and trouble-free driving. This is a truly fast car that has covered several long journeys at high speed during the last few years without breaking down once. This head-turning car , featured in a recent Octane magazine, with a 4 page article written in a very amusing style by top-reporter & classic car connoisseur Mark Dixon. This MKII benefitted only last year from a full bare metal respray, subsequently properly rust proofed and systematically maintained by us every 5.000 km. She is a joy to drive and will provide intense hours of pleasure for many years to come to its new owner. For sale for much less than what it costed to build this very usable classic Jaguar.

Marque	Jaguar
Modèle	MKII 3,4 L
Année de construction	1964
Volant	Gauche (LHD)
