Lancia Aurelia B20 GT SIV

1954

Galerie

Chassis : B20-3025 Engine : B20 N-3522 Anyone who drives this Aurelia is lost ! This is your chance to acquire what has been considered by all classic car connoisseurs as one of the best sporty saloons from her era. Not only a state of the art design by Pininfarina, but most impressively magnificent engineering by Lancia . Monocoque structure, independant front suspension and sophisticated rear axle layout, clever transaxle disposition of engine and gearbox, superb light alloy V6 engine (here in the IV-th series in the most powerful variant of 2.4L). In conclusion Lancia's masterpiece! Complete professional restoration a couple of years ago (illustrated with many photographs) confirms what was immediately clear when looking at this Aurelia now : a super quality Lancia ! The pale bronze metallic paint finish shows some slight patina, which makes the cars' appearance even more attractive. The fully retrimmed interior is still superb. Very attractive dashboard, nardi steering wheel, floor gearchange and flip out door handles. Perfect chrome, excellent Michelin tyres. You will agree with me : a real beauty ! Matching numbers and colour combination attested by a letter from the Lancia factory. And as I already mentionned when I started this description : an immense pleasure to drive ! Great Aurelia for peanuts money.

Marque	Lancia
Modèle	Aurelia B20 GT SIV
Année de construction	1954
