Lombard AL3

1928

Galerie

Chassis nr. 385254CH English and French registration documents.
Very rare and handsome Lombard cycle car.(André Lombard started to build little race cars after a succesful career at Salmson as a competition manager and works driver. The company existed only for 3 years -from 1927 till 1929 - and was taken over by BNC, who continued to build the Lombard designed race car with some small adaptations). Initially sold to England and with continuous documented history for most of its life. Also some race history is known at Prescott and shelsley Walch. Beautifully built cycle car. Fitted with superb twin overhead cam. Salmson 1100 cc engine (as most of Lombards still in existence)and 3 speed gearbox. Mechanics were recently totally overhauled, so the car is now in tip-top condition. Excellent presentation with just that little bit of patina which makes the car even nicer. Optimalised seating space which enables tall drivers to enjoy this cycle car.

Marque	Lombard
Modèle	AL3
Année de construction	1928
