Sunbeam Tiger

1965

Galerie

This magnificent Tiger with "small" 260 cubic inch V8 engine is a very well known car to us. Initially imported from a dry state in the USA, the car resided first a couple of years in the UK where the whole car was very well sorted out. A next owner in Belgium had just all the fun of having the rear wheels spun every time he wanted to impress. My friend Jacky, who had all his life a wild variety of supercars, fell in love with this Tiger as soon as he put eyes on her. Being a perfectionist, he engaged a comprehensive restoration, taking care of absolutely all the aspects of this Tiger. After months and months of patient work (and certainly also an impressive amount of money), this superb Tiger emerged from his private workshop. A couple of demonstration runs, satisfied his hunger for spectacular accelerations at the traffic lights. Now he concentrates on a MG TF which will be a much sweeter touring car. So this is your opportunity to acquire a fantastic looking Tiger and frighten off, if not yourself, than certainly everybody else on the road. This genuine "poor mans' Cobra" in totally restored condition could be yours at a mere 35.000 euro.

Marque	Sunbeam
Modèle	Tiger
Année de construction	1965
Volant	Gauche (LHD)
