Marcos Mini S

1971

Galerij

This Mini Marcos is a genuine Marcos factory built example. Easily recognizable at the 'thin' B-post proving it is indeed based on a shorter chassis. Fitted with the 1275 cc. engine producing 65 HP this lightweight Mini performs amazingly well. One can 'in a way' understand how the 1966 Le Mans entry was capable of 220 Km on the Mulsanne straight... Good thing is that this 'Mini bomb' is fitted with disc brakes! Recently resprayed in light metallic blue, exactly as the 1966 Le Mans sister car. Good presentation inside-out! Available with UK registration documents.
